

QRPF Separate Races Released on the Same Day.

To avoid confusion and potential mix-ups, QRPF clubs are required to mark and identify the race crates used when separate releases take place on the same day.

Crates must be clearly marked with tape or a tag for the later releases.

Additionally, clubs **must record the crate numbers** they are using for these races at the time of basketing and forward a copy to the QRPF race secretary before delivering the race crates to the transporter.

Club carters arriving to load their club crates on the transporter without this paperwork may not be permitted to load their race crates
